

COMPANY INTRODUCTION

For more than 30 years, AXYZ has been designing and manufacturing configurable CNC router solutions that help manufacturers improve productivity, precision, and profitability. Founded in the heart of Canada's manufacturing corridor between Toronto and Hamilton, Ontario, AXYZ has grown from a Canadian machine builder into a global provider of advanced CNC routing and cutting technology, with installations in more than 180 countries and dedicated sales and technical support teams across North America, the UK, and Europe. In 2018, AXYZ joined forces with WARDJet Waterjets to become part of AAG Tailored Cutting Solutions, expanding our ability to provide customers with industry-leading cutting technologies backed by exceptional service and support. Every AXYZ machine is engineered to meet the unique production needs of each customer, delivering the flexibility, reliability, and performance manufacturers depend on every day.

INDUSTRIES WE SERVE

AXYZ CNC routers are trusted by manufacturers across a diverse range of industries, providing tailored cutting solutions for applications ranging from high-volume production to custom fabrication. Our modular machine platforms can be configured to suit virtually any workflow, ensuring customers receive a solution built specifically for their business.

We proudly serve industries including:

- Sign & Graphics
- Print Finishing
- Aluminum & Composite Cladding
- Woodworking & Cabinetry
- Defence
- Metal Fabrication
- Plastics Fabrication
- Foam & Rubber
- Research & Prototyping
- Packaging
- and many more!

Whether you're producing one-of-a-kind prototypes or running continuous production, AXYZ delivers configurable CNC solutions that combine speed, accuracy, and reliability to help your business grow.
